Phishing Detection System - Cyber Armor

WHOIS Analysis	NLP Extraction	CNN Img/ graphic Analysis
Extract WHOIS Data	Extract Text from Web Content	Capture Webpage Screenshot/Image
Analyze Domain Registration Patterns	Perform Named Entity Recognition (NER)	Analyze Images Using CNN Model
Detect Suspicious Activities	Tag Suspicious Entities	Detect Visual Phishing Characteristics
Return output to main application	Return output to main application	Return output to main application

Main Application

Send Data
Retrieve all output
Convergence of All Output
Return Analysis results
